

PULPWOOD PRODUCTION^{1/} IN THE LAKE STATES BY COUNTY, 1983

James E. Blyth, Principal Market Analyst,

and W. Brad Smith, Mensurationist

Abstract.--Lake States pulpwood production rose to a record 6.54 million cords in 1983. Pulpwood production is shown by county and species group in Michigan, Minnesota, and Wisconsin.

KEY WORDS: Residue, Michigan, Minnesota, Wisconsin.

Pulpwood production in the Lake States--Michigan, Minnesota, and Wisconsin--climbed from 5.52 million cords in 1982 to a record 6.54 million cords in 1983. Wisconsin produced 2.47 million cords, Michigan 2.16 million cords, and Minnesota 1.91 million cords.

Ninety-two percent came from roundwood (including chips from roundwood); the remainder came from mill residue, such as slabs, edgings, veneer cores, and chips from these materials. Production from softwood and hardwood residue by State was:

<u>State</u>	<u>Softwood</u>	<u>Hardwood</u>
(Hundred standard cords, unpeeled)		
Michigan	208	1,523
Minnesota	552	387
Wisconsin	479	2,104

Principal species harvested were aspen (3,305,600 cords), pine (809,300 cords), maple (455,800 cords), birch (332,000 cords), and balsam fir (276,400 cords).

Wisconsin imported 23 percent of its pulpwood requirements, including 391,000 cords from Michigan, 156,000 cords from Minnesota, 137,000 cords from other (primarily western) States, and 32,000 cords from Canada.

Counties cutting more than 100,000 cords were Delta, Menominee, Baraga, Iron, and Marquette in Michigan; Koochiching, St. Louis, Beltrami, Cass, and Itasca in Minnesota; and Forest, Langlade, Marinette, Oneida, Vilas, Bayfield, Douglas, Price, and Sawyer in Wisconsin. These 19 counties contributed 53 percent of the pulpwood produced from roundwood in the Lake States in 1983.

^{1/}Includes logs, bolts, and wood residue used in manufacturing particleboard, waferboard, and oriented strand board.

Table 1.--Lake States pulpwood production from roundwood by county and species, 1983

(In hundred standard cords, unpeeled)
